DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 1, 3-10, 13-15, 17, 19, 20, 22, 24-26, 28, 40-50, and 53-57 is withdrawn in view of the newly discovered reference(s) cited by applicant. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-10, 13, 17, 46-50, and 53-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chauffoureaux, 3,783,011.

Chauffoureaux teaches a method of protecting plastics from photodegradation comprising placing in a closed space an organic compound having sublimation properties and an affinity for a resin of a molded article and the resin article, raising the temperature of the space such that the organic compound reaches the saturation state and after heating for a predetermined time, removing the substrate from the container. In addition, Chauffoureaux teaches that the temperature of the resin substrate may be raised up to a temperature that does not exceed the thermal decomposition temperature of the organic compound or resin. See column 2, line 58 through column 3, line 18 and Example I. Chauffoureaux does not specifically teach the usage of a vacuum, however, it would have been obvious to modify his method by using a vacuum container, which

would increase efficiency of the sublimation process and reduce treatment time.

Regarding claims 14-15, 22, and 40-45, sublimation dyes and organic compounds are well known in the art and it would have been an obvious expedient to apply the method taught by Chauffoureaux to other known sublimation materials.

Therefore, the teachings of Chauffoureaux would render obvious the invention as claimed in present claims 1, 3-10, 13-15, 17, 22, 40-50, and 53-57.

Claims 19-20, 24-25, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on December 20, 2004 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
